A Little Girl in Wonder Land,

A little daughter of Rev. David Street, of the Presbyterian Church of this town, aged eleven years, has been troubled with imperfect vision all her life. Her parents supposed it was near-sightedness, or what is termed myopia. A number of opticlass have been consulted, but the specs could see! tacles ordinarily kept by them were of no use at all, but seemed to make her eyes worse. Dr. Prentice examined the eyes worse. Dr. Frentice examined the case, and discovered the trouble to be an No eye on the right, and on the left the irregular formation of the refractive powers of the eye, called astigmatism, one Dr. Prentice operated on, By a careful measurement of the different powers of the eye, the doctor was able to grind a glass as irregular as the Dr. Prentice has the only Astign eye, only in the reverse, so that when ter of its kind in America, he having placed before that organ it became per-invented it himself while in Europe feetly normal, and by the aid of this With this instrument the most de glass the child could read the finest print and sensitive eyes can be fitted with at a natural distance, and also recognize glasses so accurately that they are repeople at a block distant.
